RECYCLING

PVB-TRIMMINGS

TROSIFOL[®]

COLLECTING INSTRUCTIONS

The PE bag must not weigh more than 20 kg.

TROSIFOL®-Trimmings must be collected either directly in colourless PE (polyethylene) bags provided for this purpose (see chapter provided materials) or they can be initially placed in very clean plastic or metal bins and then transferred to aforementioned PE bags.

The following advises how to return the PE bags.

VERY IMPORTANT:

The bags must not contain competitors' films

The bags must contain only one type of film

The bags must not contain PE interlayer films of other plastic matter

The bags must not contain paper, labels or other foreign matter

WHAT MUST NOT BE INCLUDED IN THE TRIMMINGS BINS (I. E. PE BAGS OR OCTABINS)?

Beverage tins or packaging

Food leftovers or waste as well as cigarette ash

Staples

Razor blades, other cutting tools, glass splinters

Plastic and paper disposable table-ware

NEXT STAGE FOR THE FULL PE BAGS

TROSIFOL® provides re-usable plastic boxes or pre-cut corrugated, octangular cardboard sheets for one-way octabins. The bottom, side panel and cover of the one-way octabin must be folded appropriately and placed on a disposable pallet measuring approx. 115 x 115 cm.

Each box accommodates up to 20 full PE bags. Each bag must weigh no more than 20 kg. We would like to remind you to fill each box according to the type of film.

This helps us to select and use the received boxes more rapidly.

The full boxes are secured with the lid in place. This guarantees that your consign-

ment will not be contaminated. In case of contamination the TROSIFOL®-trimmings cannot be put into the recycling circuit. Please paste the label provided by TROSIFOL® to the bin in the specified location.

DIMENSIONS OF THE BOXES:

One-way octabin:
L 110 cm x W 110 cm x H 90 cm

Re-usable plastic box:
L 120 cm x W 100 cm x H 100 cm

It states the address of the client, the type of the returned trimmings and the quantity.

STORAGE OF FULL OCTABINS

Full octabins containing approx. 20 PE bags can be stacked up to 2 pallets high. Be careful to use only TROSIFOL® original pallets or pallets of similar stability. They are made of wood and are stable, otherwise the octabins may be damaged. They should be stored in an absolutely dry, but not too hot, indoor location. Refrigerated storage is not necessary.

Do not stock more than 2 octabins. They may break or turn over.

SUPPLIES FROM TROSIFOL® FOR COLLECTION THE TRIMMINGS

PE bags

One-way octabin

Re-usable plastic box

We would like to list what is provided by TROSIFOL® free of charge in order to facilitate the collection of the trimmings.

Pre-cut corrugated cardboard sheet for one-way octabins (made up of 2 covers and side panels)
