SENTRYGLAS® XTRA™ - EASIER PROCESSING + MARKET-LEADING PERFORMANCE

Trosifol™ has launched the next generation of its industry leading SentryGlas® ionoplast interlayer.

The new product, SentryGlas® Xtra™ (SGX™), not only improves lamination processing efficiency, but also removes a number of the processing requirements placed on laminators. The result being a high quality laminate construction that delivers the outstanding operational performance synonymous with the SentryGlas® brand.

Of particular interest to laminators is the reduced risk of haze formation caused by an inadequate cooling rate. Adhesion to the air-side of glass has been significantly improved, too, with an adhesion primer no longer being required, making multiply laminated glass assemblies easier to process. There is also the potential to increase the number

SentryGlas® Xtra™

of laminates in autoclaves, increasing throughput efficiency.

Laminated Glass Interlayers
