

Life Cycle Assessment (LCA)

# Sustainability

***kuraray***

**Trosifol®**

**SentryGlas®**

Growth and responsibility towards people and the environment are fundamental principles of all Kuraray employees' actions worldwide. We are committed to the principles of Responsible Care and are aware of our responsibility for future generations. We develop products and technologies that improve the quality of life and help find solutions to current global challenges. This includes ensuring the safety of our employees, avoiding environmentally harmful consequences of industrial production, reducing energy consumption at our sites, and developing new products and technologies that protect the environment.

The basis for this is ongoing monitoring and review of our daily activities. One metric here is the 'Life Cycle Assessment' (LCA), which measures the environmental impact of a product or service.

We have currently determined the data for our two production sites in Troisdorf/Germany and Holešov/Czech Republic.

This is how Kuraray makes the world a little bit safer.

## Life Cycle Assessment (LCA) (climate change total)
