

Pool Area, Acqualina Meireles, Brazil

Immerse yourself in the luxury of Acqualina, the iconic beachfront project in Brazil, where every detail is a masterpiece of refinement and originality. The pool area, featuring an impressive 27-meter-long railing, is a stunning example of design excellence.

Crafted with SentryGlas®, these railings offer unmatched protection, clarity, and performance. In addition to enhancing the aesthetic beauty of the space, they ensure solid and long-lasting safety, achieving the perfect balance between protection and style.

Made with extra clear glass, the railings reach an imposing height of 2.8 meters, seamlessly integrating with the architecture to create a flawless experience. Furthermore, the use of SentryGlas® in the largest glass-to-glass connected pool—measuring over 50 mm in thickness—ensures durability and transparency, allowing for uninterrupted views of the serene surroundings.

Every detail of Acqualina reflects an uncompromising commitment to quality, and these railings are no exception, elevating this incredible project to a new level of luxury and innovation.
