

Automotive Museum, Munich, Germany

A dynamic architectural marvel that captures the spirit of innovation and movement, the Automotive Museum in Munich serves as a multifunctional delivery center, event space, and exhibition hall. Designed by Coop Himmelb(l)au, this iconic building features a striking double-cone structure and a sweeping, futuristic roof that appears to float, embodying BMW's cutting-edge automotive ethos.

With its fluid forms and transparent glass façades, the museum blurs the lines between interior and exterior, inviting visitors into a vibrant experience of technology and design. A true landmark that celebrates motion, precision, and modernity.
