

## Sonata Apartments, New Zealand

Experience Sonata Apartments in New Zealand, boasting breathtaking views of the prestigious St. Heliers Bay and uninterrupted panoramas of Rangitoto Island and the Hauraki Gulf. The visionary architects at The Buchan Group seized every opportunity to optimize the property's location, employing cleverly designed full-height curved low-emissivity double-glazed windows to enhance thermal performance in its sinuous layout. The graceful curves extend to the exterior balconies, featuring frameless structural glass railings that eliminate the need for interconnected handrails, preserving the awe-inspiring views.

— Within the project, marvel at full-height curved double-glazed glass facade windows, complemented by frameless curved structural glass railings made of 13.5 mm (17/32-inch) tempered and laminated SentryGlas®. Sonata Apartments epitomizes architectural sophistication and a seamless integration of design with the natural beauty of its surroundings.
