

The Vessel (Hudson Yards), New York, USA

As part of the Hudson Yards redevelopment project in Manhattan, New York City, an iconic structure and landmark known as "The Vessel" was constructed there. The project was awarded the top prize at the World Architecture Festival, which took place in Amsterdam on December 6, 2019.

SentryGlass® provides edge stability for outdoor decorative installations with exposed edges. The railings are comprised of two plies of 10mm fully tempered glass with a 1.52mm SentryGlas® interlayer.
