**SentryGlas®**

# New SentryGlas® and SentryGlas Xtra® rolls of 1.52 mm / 60 mils

We are excited to announce the availability of SentryGlas® and SentryGlas Xtra® 1.52 mm / 60 mil rolls to enhance your productivity and product quality!

## HIGHLIGHTS

- **Exceptional flatness:** The flatness of our SentryGlas® rolls ensures improved productivity
- **Enhanced optics:** Using a single 1.52 mm roll improves optics by reducing interfaces and the risk of contamination compared to two plies of 0.76 mm.
- **Eliminates the need for multi-layer ply:** By using a single 1.52 mm roll, the risk of contamination is reduced, and the need to ply multiple layers is eliminated. This simplifies the lamination process and increases efficiency.
- **Online ordering:** To make things even more convenient, our online ordering system is ready to go for these new rolls.
- **Easier handling:** Compared to using two plies of 0.76 mm, the 1.52 mm rolls are easier to handle, making layup faster and more manageable.
- **Convenient roll form:** The roll format makes storage and handling much easier than dealing with sheets, further streamlining the production process.
- **Improved de-airing & edge cutting:** These rolls offer superior de-airing and cleaner edge cutting both before and after lamination, leading to better overall results.

## SentryGlas® / SentryGlas Xtra®

Type	Thickness		Color	Roll widths		Roll lengths	
	[mm]	[mil]		[mm]	[in]	[m]	[ft]
SentryGlas®	1.52	60	Clear	1050-3300	41-130	130	430
SentryGlas Xtra®	1.52	60	Clear	1050-3300	41-130	130	430
